

Universal Link Checker Rebuilded & Fixed by P30TiP

ChangeLog :

Version 1.0 :

- Fixed all 30 Sites
- Removed non-working upload sites
- Made a simple template
- Integrated with the template
- Bug's Fixed
- Now With Web 2.0 Technology!
- Link Checker open's in a javascript popup WITH scrollbar
- Rebuilded rapid-hook link checker

INSTALLATION :

Installation is simple and easy. No need for a SQL database, or any chmoding. So simple!

Step One :

- 1- Open index.php.
- 2- Find :
`$site_name = "Universal Link Checker";`
- 3- Replace Universal Link Checker with your own site name.

Step Two :

Upload all contents of "UPLOAD" folder to your webhost. No install, SQL import or any thing else needed. Enjoy!
